

2014 Latest Microsoft 70-688 Exam Dump Free Download!(11-20)

QUESTION 11 Hotspot Questions You support desktop computers that run Windows 8 Enterprise. One computer is a member of a workgroup and is used as a guest computer in a reception area. You need to configure the SmartScreen setting to require administrator approval before running downloaded unknown software on the desktop computer. Which policy setting should you use? (To answer, select the appropriate object in the answer area.)

Answer:

QUESTION 12 You administer computers that run Windows 8 Pro. Your company uses credit card readers that require a custom driver supplied by the manufacturer. The readers frequently are moved from computer to computer. Your company recently purchased five new computers that run Windows 8 Pro. You want the required drivers to be installed automatically and silently when users connect the readers to the new computers. You need to pre-stage the credit card reader driver on the new computers. What should you do? A. Add a Registry key with a path to a network shared folder that has the driver installation files. B. Run the pnputil.exe utility. Specify the document scanner driver. C. Add a Registry key with a path to a local folder on every computer. Copy the driver installation files to the folder. D. Run the dism.exe utility. Copy the driver files to the C:\Windows\System32\drivers folder in the WIM image. Answer: B

QUESTION 13 You support computers that run Windows 8 Enterprise. Your company protects all laptops by using the BitLocker Network Unlock feature. Some employees work from home. You need to ensure that employees can log on to their laptops when they work from home. What should you do? A. Provide employees their BitLocker PINs. B. Ensure that the Trusted Platform Module (TPM) chips in the laptops are version 1.2 or greater. C. Enable BitLocker To Go. D. Have users run the Manage-bde.exe -unlock command before they disconnect from the company network. Answer: A

QUESTION 14 Drag and Drop Questions You administer computers and printers on your company network. The computers run

Windows 8 Pro. You need to remove a print job from a print queue by using a remote PowerShell session. Which three commands should you run in sequence? (To answer, move the appropriate commands from the list of commands in the answer area and arrange them in the correct order.)

Answer Area

- Get-Printer
- Remove-PrintJob
- Get-PrintJob
- Set-Printer
- Set-PrintConfiguration
- Get-PrintConfiguration

Answer:

Answer Area

- Get-Printer
- Get-PrintJob
- Remove-PrintJob

Explanation: Note: * The Get-Printer cmdlet retrieves a list of printers installed on a computer. You can also use Get-Printer to retrieve the properties of a single printer, and then use that information as input into other cmdlets. * Get-PrintJob Retrieves a list of print jobs in the specified printer. The Get-PrintJob cmdlet retrieves the current print jobs in the specified printer. Use the PrinterName parameter to list the print jobs from the specified printer. * Remove-PrintJob Removes a print job on the specified printer. Reference: Get-Printer; Get-PrintJob; Remove-PrintJob

QUESTION 15 You administer Windows 8 Pro and Windows RT tablets for your company. Your company network includes a Windows Server 2012 domain and Microsoft Exchange 2010 with ActiveSync and Outlook Web Access. Users will be using the tablets outside of the corporate network. The Microsoft Exchange ActiveSync policy is configured to require an alphanumeric password. You need to ensure an alphanumeric password is required on all Windows 8 tablets. What should you do? A. From the Mail app, add the user's Exchange account. B. Set up New Partnership in Sync Center. C. From Sync your Settings, set Password to Off. D. Create a user profile by using a Microsoft account. Answer: A

QUESTION 16 You support computers that run Windows 8 and are members of an Active Directory domain. Recently, several domain user accounts have been configured with super-mandatory user profiles. A user reports that she has lost all of her personal data after a computer restart. You need to configure the user's computer to prevent possible user data loss in the future. What should you do? A. Configure the user's documents library to include folders from network shares. B. Remove the .man extension from the user profile name. C. Add the .dat extension to the user profile name. D. Configure Folder Redirection by using the domain group policy. Answer: D

QUESTION 17 Drag and Drop Questions You administer computers that run Windows 8. The computers on your network are produced by various manufacturers and often require custom drivers. You need to design a recovery solution that allows the repair of any of the computers by using a Windows Recovery Environment (WinRE). In which order should you perform the actions?
