

Official 2014 Latest Microsoft 70-410 Exam Dump Free Download(411-420)!

QUESTION 411 Your network contains several servers that run Windows Server 2012 R2 and client computers that run Windows 8.1. You download several signed Windows PowerShell scripts from the Internet. You need to run the PowerShell scripts on all of the servers and all of the client computers. What should you modify first? A. the environment variables on all of the servers B. the environment variables on all client computers C. the execution policy on all of the servers D. the execution policy on all of the client computers Answer: D QUESTION 412 Hotspot Question You have a Hyper-V host named Server1 that runs Windows Server 2012 R2. Server1 hosts 50 virtual machines. You need to create a script to list all of the virtual machines that have checkpoints and support Secure Boot. What should you do? To answer, select the appropriate options in the answer area.

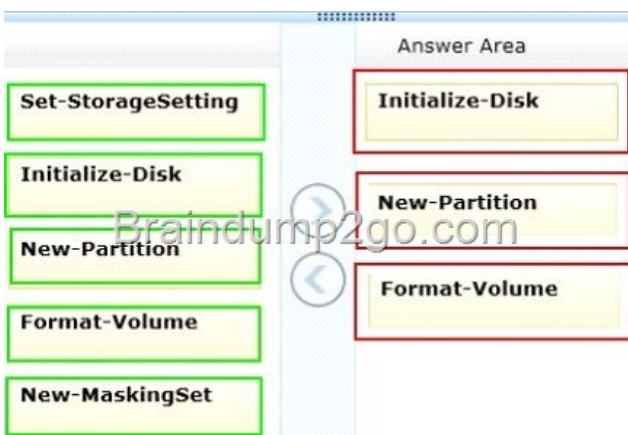

Answer:

QUESTION 413 Your network contains an Active Directory domain named contoso.com. The domain contains a domain controller named Server1 that runs Windows Server 2012 R2. On Server1, you create a work folder named Work1. A user named User1 connects to Work1 from a computer named Computer1. You need to identify the last time the documents in Work1 were synchronized successfully from Computer1. What should you do? A. From Windows PowerShell, run the Get-SyncShare cmdlet. B. From Windows PowerShell, run the Get-SyncUserSettings cmdlet. C. From Server Manager, review the properties of Computer1. D. From Server Manager, review the properties of User1. Answer: D QUESTION 414 Drag and Drop Question You have a server named Server1 that runs Windows Server 2012 R2. You add a new internal SAS disk to Server1. You need to ensure that the new disk is available to store files. Which three cmdlets should you run in sequence? To answer, move the appropriate three cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Answer:

QUESTION 415 Drag and Drop Question You have a Hyper-V host named Host1. Host1 contains two virtual machines named VM1 and VM2. VM1 is configured as a print server. VM1 runs Windows Server 2008 R2. VM2 is configured as a file server. VM2 runs Windows Server 2012 R2. You need to migrate all of the printers on VM1 to VM2. Which actions should you perform on the virtual machines? To answer, drag the appropriate action to the correct servers in the answer area. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Actions

- Run **smigdeploy.exe**.
- Run **printbrm.exe -p all:org**.
- Install the Print and Document Services role.
- Install the Windows Server Migration Tools feature.
- From the Print Management console, import the printers.
- From the Print Management console, export the printers.

Answer:

Answer Area

VM1

- From the Print Management console, export the printers.

VM2

- Install the Print and Document Services role.
- From the Print Management console, import the printers.

QUESTION 416 Drag and Drop Question Your network contains an Active Directory domain named contoso.com. All servers run Windows Server 2012 R2. All client computers run Windows 8. The domain contains a security group named Group1. You have a Group Policy object (GPO) named GP01. GP01 is linked to the domain. You need to ensure that only the members of Group1 can run the applications shown in the following table.

| Application name | Application file |
|------------------|------------------|
| App1 | App1.com |
| App2 | App2.js |
| App3 | App3.appx |

Which type of application control policy should you implement for each application? To answer, drag the appropriate rule types to the correct applications. Each rule type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Rule Type

- Executable Rule
- Packaged app Rule
- Script Rule
- Windows Installer Rule

Answer Area

App1: Rule type

App2: Rule type

App3: Rule type

Answer:

| Rule Type | Answer Area |
|------------------------|-------------------------|
| Executable Rule | App1: Executable Rule |
| Packaged app Rule | App2: Script Rule |
| Script Rule | App3: Packaged app Rule |
| Windows Installer Rule | |

QUESTION 417 Your network contains an Active Directory domain named contoso.com. The domain contains 100 user accounts that reside in an organizational unit (OU) named OU1. You need to ensure that a user named User1 can link and unlink Group Policy objects (GPOs) to OU1. The solution must minimize the number of permissions assigned to User1. What should you do? A. Add User1 to the Group Policy Creator Owners group. B. Modify the permissions on the User1 account. C. Modify the permissions on OU1. D. Run the Delegation of Control Wizard on the Policies container. Answer: C

QUESTION 418 Your network contains an Active Directory domain named contoso.com. The domain contains hundreds of groups, many of which are nested in other groups. The domain contains a user account named User1. User1 is a direct member of 15 groups. You need to identify of which Active Directory groups User1 is a member, including the nested groups. The solution must minimize administrative effort. Which tool should you use? A. ADSI Edit B. Get-ADUser C. Active Directory Users and Computers D. Dsget Answer: B

QUESTION 419 Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1. The domain contains a standalone server named Server2 that is located in a perimeter network. Both servers run Windows Server 2012 R2. You need to manage Server2 remotely from Server1. What should you do? A. From Server2, run the Enable-PsRemoting cmdlet. B. From Server1, run the winrmi command. C. From Server2, run the winrm command. D. From Server1, run the Enable-PsRemoting cmdlet. Answer: A

QUESTION 420 Your network contains an Active Directory forest named contoso.com. The forest contains five domains. All domain controllers run Windows Server 2012 R2. The contoso.com domain contains two user accounts named Admin1 and Admin2. You need to ensure that Admin1 and Admin2 can configure hardware and services on all of the member servers in the forest. The solution must minimize the number of privileges granted to Admin1 and Admin2. Which built-in groups should you use? A. Server Operators global groups B. Domain Admins global groups C. Administrators domain local groups D. Administrators local groups Answer: B
